Professional Summary

Full-Stack Software Engineer with production experience designing and shipping scalable web applications across the full stack – React.js, Node.js, WebSocket APIs, and MongoDB. Proven ability to independently architect features, optimize system performance, and collaborate cross-functionally in fast-paced environments. Targeting SDE / Full-Stack roles at high-growth engineering organizations.

Technical Skills

Languages: Java, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux, Redux Toolkit, React Hooks, React Router, Zustand, Tailwind CSS, Bootstrap, Responsive Design

Backend & APIs: Node.js, Express.js, REST API Design, WebSocket/Socket.IO, JWT Authentication, Better-Auth, Middleware Architecture

Databases: MongoDB (Mongoose), SQL (MySQL)

DevOps & Tools: Git, GitHub, Postman, VS Code

Professional Experience

DeccanLogic Pvt. Ltd.

November 2024 – March 2025

Associate Software Developer – (React.js)

Pune, Maharashtra

- Architected and shipped a production-grade CRM platform for financial advisory services using React.js and Redux, serving real client workloads with zero critical post-launch defects.
- Designed a rule-based client assignment engine that automated advisor routing logic, reducing manual advisor workload by an estimated 40% and improving client response SLA.
- Integrated RESTful API endpoints, collaborating closely with backend engineers to ensure data contract alignment, error-boundary handling, and optimistic UI updates.
- Refactored legacy component tree to a Redux Toolkit state architecture, eliminating prop-drilling across 5+ levels and reducing redundant re-renders.

EagleByte Solutions Pvt. Ltd.

August 2024 – November 2024

Frontend Developer Intern

Pune, Maharashtra

- Built 5+ responsive web projects (portfolio, Spotify clone, e-commerce UI) using HTML5, CSS3, and vanilla JavaScript, reinforcing cross-browser compatibility, accessibility, and async JavaScript patterns used in production React codebases.

Technical Projects

ConneCTable – Real-Time Chat Application | *React.js, Node.js, Socket.IO, MongoDB, JWT, Zustand* | [Live Demo](#)

- Built a full-stack real-time messaging system with WebSocket (Socket.IO) bidirectional event architecture achieving sub-100ms message delivery latency under local load tests.
- Designed RESTful APIs with Express.js for user auth, chat history retrieval, and room management; persisted messages in MongoDB with indexed queries for fast history pagination.
- Implemented JWT-based authentication with token refresh logic; managed global frontend state (rooms, presence, threads) using Zustand, eliminating prop drilling.

CareerPath – Job Application Tracker | *Next.js, Tailwind CSS, Better-Auth, MongoDB* | [Live Demo](#)

- Developed a Kanban-style tracker (Wishlist → Applied → Interviewing → Offer → Rejected) with drag-and-drop (dnd-kit) and optimistic UI updates, eliminating loading states for pipeline transitions.
- Implemented secure authentication and session management with Better-Auth, ensuring user-scoped data access across all API routes.
- Built a drag-and-drop Kanban board (Wishlist, Applied, Interviewing, Offer, Rejected) with optimistic UI updates..

Education

Savitribai Phule Pune University (SPPU)

June 2024

Bachelor of Engineering – Computer Engineering, CGPA: 7.63 / 10.0

Pune, Maharashtra

Jawahar Navodaya Vidyalaya

July 2020

Class XII (CBSE), 71.4%

Chh. Sambhajinagar, Maharashtra

Certifications

Python Programming – Microsoft & Skill India Digital Hub

Java Programming – Simplilearn

JavaScript Fundamentals – Sololearn
